

Canterbury Biodiversity Film Competition

*We invite you to create a short film
about Canterbury's native plants and wildlife.*

Your film could explore uniqueness or variety, animal and plant relationships, threats to biodiversity or initiatives to protect or enhance it. Or you can pick your own angle, so long as it features native plants and wildlife from your neighbourhood.

- Individual or team entries must be from Canterbury residents.
- Final entries must be five minutes long or less.
- There are two entry categories: 15 and under, and over 15.

The winner of each category will receive a quality digital camera and can nominate their favourite biodiversity project to receive a \$500 cash donation.

A selection of the best entries will feature on the website of the Canterbury Biodiversity Strategy (see web address below) and be made into a compilation DVD.

The competition starts on 22 May. Entries to be received by 13 September. Winners will be notified on 1 October.

For further details contact the Regional Biodiversity Coordinator at wayne.mccallum@ecan.govt.nz or go to www.canterburybiodiversity.org.nz
